PREFACE

This is one in a series of 8 publications relating to the 1974-75 Household Expenditure Survey. It contains estimates of household expenditure classified by selected household characteristics.

First results of the survey were presented in summary form in Bulletin No. 2 : Preliminary Results, which was published in July 1976. Some of those figures are revised in this bulletin.

For details of the other publications in the series see page 36.

This was the first major survey of its kind to be undertaken by the Australian Bureau of Statistics. It was conducted in order to find out how the expenditure pattern of private households varies according to income level and other characteristics such as size and composition of the household, age and occupational status of the household head. Information of this kind had been sought for a wide range of policy and research purposes.

While the first survey was confined to capital cities, a second survey was conducted in respect of the year 1975-76 and covered non-metropolitan areas also.

Special thanks go to the sample of households whose co-operation and high degree of response was vital to the success of the survey.

R. J. CAMERON
Australian Statistician

Australian Bureau of Statistics

EXPLANATORY NOTES¹

Scope and coverage

The estimates contained in this bulletin are based on a sample of private dwellings selected in the six State capital cities and Canberra². Private dwellings included houses, home units, flats, caravans, and any other structures being used as private places of residence. Hotels, boarding houses, institutions, etc., were defined as special dwellings outside the scope of the survey.

2. Information was collected on a household basis (see paragraph 8), rather than for selected individuals in the population, because many items of expenditure relate to the household as a unit. These include shared expenditure on items such as food, accommodation and household goods and appliances. The following categories of households (or persons) were excluded from the survey:

- (a) foreign diplomats and their staff;
- (b) foreign servicemen and their families stationed in Australia;
- (c) persons from overseas countries touring or holidaying in Australia;
- (d) visitors staying with the household for less than four weeks after the initial interview;
- (e) usual residents absent at the time of the initial interview and not returning within 7 days; and
- (f) usual residents who were going away within 7 days of the initial interview and not returning before the end of the two-week diary keeping period.

Children under 15 years of age who were away at boarding school or away for less than four weeks were included as members of a household.

3. Of the 12,000 households selected for the survey, 9,095 supplied the complete range of data. The difference is accounted for by households which could not be contacted; were unable to fully participate; or were otherwise non-respondent. The estimation procedure was designed to represent such households by using data for responding households which were judged to be similar for certain characteristics.

Collection method

4. Personal interviews by trained interviewers were used to collect information on expenditure items which occur infrequently (e.g. purchase of vehicles and

property, and the payment of household bills such as electricity and gas) and to collect details of income. In addition, all household members aged 15 years and over were asked to record all payments made over a two-week period in a diary provided to each of them. Consequently each household was involved in the survey for two weeks, although the sample of households was spread evenly over the 12-month survey period.

Definitions

5. *Expenditure* was defined as all payments for goods and services for private use, made by all members of the selected household aged 15 years and over. In general, expenditure was collected on the basis of payments made during the reference period rather than on the basis of goods and services 'acquired' or 'consumed' during the period. As indicated in paragraph 4, information about most types of expenditure was obtained on a current basis from the diary, although some infrequent items of expenditure were collected on a 'recall' or last payment basis. The length of the recall period ranged from two years for house purchase to three months for health expenses.

6. *Income* was defined as gross income from all sources before taxation and other deductions were made, and was collected from all members of the selected household aged 15 years and over. The main components of income are:

- (a) wages and salaries (including income-in-kind received from an employer);
- (b) income derived from self-employment (including wages and income-in-kind taken from the business);
- (c) government social service benefits;
- (d) income from investments (including interest, dividends, royalties and rent); and
- (e) other regular income (including educational grants and scholarships received in cash, benefits received from an overseas government, income received for professional advice outside the normal job situation, superannuation, worker's compensation, alimony or maintenance, and any other allowances regularly received).

The principal source of household income was that income source which represented the largest single component of household income.

¹ For a detailed explanation of the concepts, methodology and procedures used in the 1974-75 Household Expenditure Survey, see Bulletin 1 *An Outline of Concepts, Methodology and Procedures*.

² Dwellings for Darwin were selected in the original sample. However, cyclone Tracy in December 1974 caused the suspension of operations in Darwin and no estimates for Darwin are included in this bulletin.

7. Although information about most types of income was obtained on a current basis, some data, principally incomes from investment and from self-employment, were obtained in respect of the previous twelve months or financial year.

8. *A Household* was defined as a group of people, who live together as a single unit in the sense that they have common housekeeping arrangements; that is, they have some common provision for food and other essentials of living. A person, or persons, living in the same dwelling but having separate catering arrangements, constituted a separate household.

9. *The Head of a household* was taken to be that person nominated by the member(s) of the household as the 'head'. This person was usually the male 'breadwinner'.

10. *Adults/Children.* Adults are persons aged 18 years and over. Children are persons under 18 years of age. However, a head of household is defined as an adult irrespective of age.

11. *Employment status.* All persons aged 15 years and over were classified either as workers or as non-employed persons (e.g. housewife, retired, unemployed, full-time student) on the basis of whether or not they reported 'earned' income.

12. *Workers* are those persons aged 15 years and over who reported any 'earned' income (i.e. income from self-employment or from part-time or full-time wage and salary employment). In general, persons who were asked to report 'earned' income were those who worked in a job or business, or received income from a job or business, at any time during the four weeks prior to the week of interview.

13. *Retired persons* are those persons who reported no 'earned' income and who described themselves as being retired (e.g. having retired from work for reasons of age or sickness).

14. *Occupation of head of household.* Occupation was coded for all persons who were wage and salary earners in their main job using a classification based on the Classification and Classified List of Occupations (CCLO) used during the 1971 Census of Population and Housing.

15. *Pensioners* are those persons who reported regular income from Social Security or Repatriation Benefits (e.g. age, invalid, widows, war pension, unemployment or sickness benefits).

Interpretation of results

16. Since the estimates are based on a sample, they may differ from the figures that would have been obtained from a collection based on the whole population using the same questionnaires and procedures. These differences are called sampling errors. One measure of the sampling error of an estimate is the standard error percent (i.e. the standard error expressed as a percentage of the estimate). The size of the standard error percent of an estimate depends on :

- (a) the size of the sample on which the estimate is based (the smaller the sample, the larger is the standard error percent);
- (b) the variability in frequency of reporting and in the size of the reported values (e.g. expenditure on household appliances would be more variable and hence have a higher standard error percent than expenditure on meat).

Care should be exercised in the use of estimates for those expenditure items subject to large variability. In particular some of the items relating to expenditure on clothing and footwear, household equipment and operation, recreation and education, and 'other payments' (notably in gambling and in capital housing costs) may be subject to large sampling errors. Details of standard errors associated with the figures in this bulletin are not yet available for publication although some advice can be given on application to the Central Office of the ABS. Bulletin No. 3, *Standard Errors* will provide a guide to the standard errors of estimates in this and other bulletins in the series.

17. In addition to sampling errors, the estimates are subject to the following types of non-sampling errors:

- (a) errors in reporting (e.g. because some answers were based on memory, or because of misunderstanding or unwillingness of the respondent to reveal all details);
- (b) biases caused by differences which may have existed in the characteristics and patterns of expenditure and income between respondent and non-respondent households within the scope of the survey;
- (c) errors arising during processing (e.g. coding, data recording). In particular, the detailed statistics in Tables 8.1, 8.2, 8.9 and 8.11 of this bulletin are more susceptible to errors arising from the incorrect classification of individual payments to expenditure categories than are the more broadly classified statistics in the remainder of the bulletin.

Considerable effort was made to minimise these types of errors by careful questionnaire design, intensive training and supervision of interviewers, asking respondents to refer to records wherever possible, and extensive editing and quality control checking at all stages of data processing. In an attempt to minimise biases caused by non-response, adjustments were made to the weights¹ allocated to respondent households having certain characteristics, in an attempt to take account of the number of non-respondent households with the same characteristics.

18. When comparing the estimates of expenditure in this bulletin with estimates based on other statistics such as production, sales and excise data, it seems that expenditure on certain items, particularly alcohol and tobacco, is understated. This would be in line with experience in other countries which have carried out similar surveys. However, it is not possible to make precise comparisons because of differences in scope between this survey and other statistical data.

19. Because of the extended collection period of the survey, changes in money values and changes in the relative prices of goods and services have some implications for the interpretation of the results. The time reference periods of data items differed, first, because households were approached at different points of time during the 12 months duration of the survey and, second, because data items were obtained in respect of varying time reference periods (e.g. medical expenses in respect of the previous 3 months, purchase of motor vehicles in the previous 12 months). These factors may have caused some data distortion and complicate the interpretation of results for certain purposes. For example, two households with similar characteristics, one selected towards the beginning of the survey period and the other towards the end, may have been classified into different income groups solely because of changes in wage levels between the two collection dates. In a sense, therefore, all classifications and data items are based on average prices or incomes prevailing over the period to which the collected data related.

Quantiles

20. Any distribution may be divided into equal parts called quantiles. Tables 8.17–8.25 show quantiles of household expenditure for the main classificatory variables used in the survey. The quantiles shown are the lowest and highest decile, the lower and upper quartile and the median.

21. The median is the value (e.g. of household expenditure) which divides the distribution into two

equal groups, one having values above the median and the other having values below it.

22. The quartiles of a distribution are the values which divide the distribution into four equal groups. For example, the upper quartile of household expenditure is that level of expenditure which is exceeded by 25 per cent of households while at the lower quartile 75 per cent of households will exceed the expenditure shown.

23. The deciles of a distribution are the values which divide the distribution into ten equal groups. For example, the highest decile of household expenditure is that level of expenditure which is exceeded by 10 per cent of households while at the lowest decile 90 per cent of households will exceed the expenditure shown.

24. In the calculation of quantiles for this bulletin zero values were included as part of the distribution. This accounts for the zero value in the lowest decile for some of the commodities shown in table 8.23.

All publications produced by the ABS are listed in *Catalogue of Publications* (Catalogue No. 1101.0. Previously Ref. No. 1.8) which is available free of charge from any office of the ABS.

1 The factors used to expand the sample data to obtain population estimates.

NOTE. Where differences occur in tables between totals and the sums of components, these are due to rounding and to differences in the methods of deriving estimates at the different levels of expenditure.

FOOTNOTES AND SYMBOLS

- (a) The sum of all payments for goods and services made by household members aged 15 years and over. *See* paragraph 8 for definition of a household.
 - (b) Sydney, Melbourne, Brisbane, Adelaide, Perth, Hobart, Canberra.
 - (c) Employment status refers to whether a person is an employee, self-employed or non-employed.
 - (d) Those workers who are wage and salary earners in their main job.
 - (e) Those workers whose main source of 'earned' income is their own business or partnership.
 - (f) Those persons aged 15 years and over who did not report any 'earned' income. Included are housewives, retired persons, unemployed persons and full-time students.
 - (g) Occupation was coded only for 'employees', on the basis of their main job, using a classification based on the 1971 Census of Population *Classification and Classified List of Occupations* (*See* Appendix 2 of Bulletin 1)
 - (h) Professional, technical and related workers; administrative, executive and managerial workers.
 - (i) Includes book-keepers, typists and shop assistants.
 - (j) Includes production process workers.
 - (k) Employees engaged in farming, fishing, hunting and timber getting; miners, quarrymen and related workers; workers in transport and communication; service, sport and recreation workers; and members of armed services.
 - (l) The sum of the gross weekly incomes of household members aged 15 years and over. *See* paragraphs 6 and 7 for definition of income.
 - (m) Principal source of household income is that income source which represents the largest single component of household income.
 - (n) Usual gross wages and salaries. Includes the weekly equivalent of regular but infrequent additions to wages and salaries such as quarterly and annual bonuses; and the value of any goods and services regularly received free from an employer.
 - (p) Share of trading profit after deduction of business expenses but before deduction of personal tax.
 - (q) Includes child endowment; pension (e.g. age, invalid, widows, war service, war widow); unemployment, sickness or special benefits and T.B. allowance.
 - (r) Includes bank and other interest, dividends, royalties and rent.
 - (s) Includes educational grants and scholarships received in cash, benefits from an overseas government, earnings from professional advice outside the normal job situation, earnings from odd jobs, superannuation, workers compensation, alimony and maintenance allowances.
 - (t) Households where the head is in receipt of regular income from Social Security or Repatriation benefits (e.g. age, invalid, widows, war pension; unemployment or sickness benefits) excluding child endowment.
 - (u) Households may contribute to more than one column as it is possible for the head of the household to be in receipt of more than one type of pension.
 - (v) Includes utilities, station wagons, trucks and vans as well as cars owned by or available for continuous use by members of the household.
 - (w) *See* paragraphs 20-24.
 - (x) Households where no member (other than the head) is under the age of 18. The head of household is defined as an adult irrespective of age.
 - (y) Households containing persons (other than the head) under 18 years of age. The head of household is defined as an adult irrespective of age.
-
- (A) Item numbers refer to expenditure ('commodity or service') groups. Details of the individual items which comprise expenditure groups are given in Appendix 1 of Bulletin 1.
 - (B) Households providing the full range of information sought. Data provided by sample households were expanded to produce estimates relating to all households represented by the survey.
 - (C) *See* paragraph 2 for criteria used in determining whether or not individual persons are included as members of a household.
 - (D) *See* paragraph 12.
 - (E) *See* paragraph 13.
 - (F) *See* paragraph 9. Age was recorded in number of years.
 - (G) Household income is the sum of the gross weekly incomes of household members aged 15 years and over. *See* paragraphs 6 and 7 for definition of income.
 - (H) Included in 'current housing costs' are both the principal and interest components of any housing loan repayments. Excluded are outright purchase of, or deposit on, dwellings or land, and other payments of a capital nature, which are included in 'Other payments'.
 - (I) Does not include the item 'Other payments'.
 - (J) Included are payments such as income tax, superannuation contributions, life insurance premiums, purchases of and deposits on dwellings and land, and gambling payments. Receipts from sales of dwellings and land, and gambling winnings, are offset against payments. As a result 'Other payments' sometimes appears as a negative value.

- (K) Includes dwellings rented from bodies such as government housing authorities and the housing section of the Department of the Capital Territory. Dwellings rented to employees by government bodies such as Departments of Army, Education, Railways, and by municipal councils are excluded (these are included in 'other landlord').
- (L) Average weekly expenditure on 'current housing costs' of those households in each occupancy group.
- (M) Net of sales, and insurance claims where items are 'written off'.
- (N) Radio and T.V. licences were discontinued in August 1974. However, expenditure on this particular item was reported on the basis of payment made for a licence current at the time the household was interviewed.
- (P) The total amount of personal income tax (less any refunds) paid in the last financial year by household members aged 15 years and over.
- (Q) Estimates of expenditure on health services are net of any refund received or expected to be received.

* This figure reflects the effect of some unusual instances of expenditure in a relatively small sample.

† Information not shown because the figures are subject to sampling variability too high for most practical purposes.

.. No data recorded.

0.00 Average value of less than 0.005.

‡ Excludes 9 households that reported no income.

1974-75 HOUSEHOLD EXPENDITURE SURVEY PUBLICATIONS

The results of the 1974-75 Household Expenditure Survey are being issued progressively in a series of eight bulletins. The bulletins (listed below) may be purchased through the mail from Mail Order Sales, Australian Government Publishing Service, P.O. Box 84, Canberra, A.C.T. 2600; over the counter from the Australian Government Publishing Service Bookshops in each State capital; and through the mail or over the counter from offices of the Australian Bureau of Statistics in each State capital.

The title and the new catalogue number of each publication is shown below, followed by its price, the price including postage, and a brief summary of contents.

BULLETIN 1 AN OUTLINE OF CONCEPTS, METHODOLOGY AND PROCEDURES (Catalogue No. 6507.0. Previously Ref. No. 17.19)(\$1.20, \$1.60)

Provides a detailed description of survey objectives, scope and coverage, concepts and definitions used and sample design and methodology.

BULLETIN 2 PRELIMINARY RESULTS (Catalogue No. 6508.0. Previously Ref. No. 17.20)(70c, \$1.00)

Contains for each capital city, estimates of household expenditure (broad groupings) classified by income. Also contains, for all capital cities combined, estimates of household expenditure (broad groupings) classified by household composition, work status and occupation of the household head, age of household head, and estimates for each quarter of 1974-75.

BULLETIN 3 STANDARD ERRORS (Catalogue No. 6509.0. Previously Ref. No. 17.21)(80c, \$1.20)

Contains estimates of the sample errors associated with data items in the survey, for use in assessing the reliability of particular survey results.

BULLETIN 4 EXPENDITURE CLASSIFIED BY INCOME OF HOUSEHOLD (Catalogue No. 6510.0. Previously Ref. No. 17.22)(\$1.10, \$1.50)

Contains estimates of household expenditure (detailed groupings) classified by income, for each capital city.

BULLETIN 5 QUARTERLY EXPENDITURE PATTERNS (Catalogue No. 6511.0. Previously Ref. No. 17.23)(60c, 90c)

Contains estimates of household expenditure for each quarter of 1974-75 for each capital city.

BULLETIN 6 EXPENDITURE CLASSIFIED BY HOUSEHOLD COMPOSITION (Catalogue No. 6512.0. Previously Ref. No. 17.24)(90c, \$1.30)

Contains estimates of household expenditure by income and household composition (that is, number of adults and children).

BULLETIN 7 INCOME DISTRIBUTION (Catalogue No. 6513.0. Previously Ref. No. 17.25)(\$1.00, \$1.40)

Contains information on the sources of income and distribution of income for households and for persons.

BULLETIN 8 EXPENDITURE CLASSIFIED BY SELECTED HOUSEHOLD CHARACTERISTICS (Catalogue No. 6514.0. Previously Ref. No. 17.26)(\$1.10, \$1.50)

Contains expenditure estimates for households with selected characteristics (for example, where the head of household was born overseas; pensioner households).

Further details of the tables included in each of the above publications can be found in Bulletin 1.
